

# THANK YOU

Supporting families on their journey to optimal health is what our family is passionate about.

Every choice you make matters, and we appreciate the trust that you have put in us in choosing your Sustainable Containable.

We're in this together – join us on our mission to help make our planet and all our families healthier.

WE WOULD LOVE YOUR FEEDBACK! :)

- 100% platinum silicone lids - free of BPA, BPS, phthalates, lead, heavy metals, plastic and plasticizers
- Eco-friendly, non-toxic, plastic-free

## FUNCTIONAL

- Lighter and more durable than glass
- Shatterproof
- Leakproof lids
- Clear / See-through lids

## VERSATILE

- Oven safe (remove silicone lid when baking)
- Dishwasher safe
- Freezer safe

2 Year Warranty

# CLEANING & MAINTENANCE

With proper care, your Sustainable Containable will last for many years to come.

## EVERYDAY CARE

Wash by hand with hot soapy water using a soft cloth/sponge or place in dishwasher before first use.

- Do not use steel wool or metallic/abrasive scouring pads on the stainless steel or silicone.
- Do not use harsh chemicals or bleach.

### Spots from the dishwasher?

These are caused by mineral deposits in hard water and will vary based on your region and the detergent used. Simply rinse with warm water or wipe with a damp cloth.

### Stains on Silicone?

It is natural for silicone to take on the colors and odors of some foods. Staining will not affect functionality.

Boiling in water with lemon or white vinegar can help stains dissipate. For stubborn stains, try soaking containers in hydrogen peroxide or oxygen bleach overnight. Exposing silicone outside in direct sunlight is also effective at fading stains.
